

Energy Surcharge 2026

LINEAS

OUR BASE OFFER INCLUDES AN ENERGY COST UP TO € 80 PER MWH OR € 0,95 PER LITER IN OUR STANDARD CONTRACT CONDITIONS, UNLESS SPECIFIED OTHERWISE.

Framework of our offer and the energy surcharge

- Lineas covers in its base offer an energy cost up to €80/MWh or €0,95/L.
- Energy cost above €80/MWh or €0,95/L will be charged as a surcharge with no margin.
- The surcharge is charged as a percentage of the total transport price.
- The value of the surcharge is based on the EEX Power Futures for electricity and the Brent Crude Oil Index for diesel, corrected with the Diesel Decoupling Factor (DDF) as from Q4 2026.
- We adjust energy rates and surcharge values per quarter.

Lineas surcharge grid Conventional Traffic – Electricity

Energy Surcharge Grid for 2026 based on the EEX power futures

- The energy surcharge will be expressed in percentage of the transport price.
- On the 26th day of the last month of the quarter, we publish the rate for upcoming quarter on our website.
- The grid below is applicable for the year 2026.
- For trains railing through multiple countries, an average of those countries will be applied.

EEX- Market rate (€/MWh)	0-19	20-39	40-59	60-79	80-99	100-119	120-139	140-159	160-179	180-199	200-219	220-239	240-259	260-279	280-299	300-320
BE	0,0%	0,0%	0,0%	0,0%	1,2%	1,7%	2,2%	2,8%	3,3%	3,8%	4,3%	4,9%	5,4%	5,9%	6,4%	7,0%
DE	0,0%	0,0%	0,0%	0,0%	0,9%	1,5%	2,0%	2,5%	3,0%	3,6%	4,1%	4,6%	5,1%	5,7%	6,2%	6,7%
NL	0,0%	0,0%	0,0%	0,0%	1,0%	1,6%	2,1%	2,6%	3,1%	3,7%	4,2%	4,7%	5,2%	5,8%	6,3%	6,8%

International	0,75%	0,75%	0,75%	2,75%

The values for the upcoming quarter are always published on the 26th day of the last month before the respective upcoming quarter.

New as from Q4 2026: Diesel Decoupling Factor (DDF)

Why and how the Brent index is corrected for diesel

Why a new factor?

Brent and diesel no longer move together.

Compared to the reference of 72 \$/Barrel, Brent is + 38 %, while diesel is + 72 % (1,353 €/L vs 0,785 €/L) for the same reference period as stated above.

A diesel surcharge based on Brent alone would pass on only about half of the real diesel increase.

What is the DDF?

The DDF is a new correction on the Brent index for diesel. It measures how much more diesel has risen than Brent:

$$\text{DDF} = (1 + \text{diesel increase}) \div (1 + \text{Brent increase})$$

Brent × DDF gives the "Brent equivalent": the Brent price at which the diesel grid is read.

How does it work?

The DDF is recalculated every quarter, in the same window as the Brent index, and published together with the surcharge.

Diesel source: EC Weekly Oil Bulletin, automotive diesel excl. duties and taxes, average of BE, FR, NL and DE.

What stays the same: the base offer up to € 0,95 per liter, the diesel grid per country, the quarterly update and the publication date. The reference 72 \$/Barrel = 0,785 €/L is only used to measure the gap between Brent and diesel.

Lineas surcharge grid Conventional Traffic: Diesel

Energy Surcharge Grid for 2026: Brent × DDF

- The energy surcharge will be expressed in percentage of the transport price.
- On the 26th day of the last month of the quarter, we publish the rate for the upcoming quarter on our website.
- The grid below is applicable for the year 2026.
- For trains railing through multiple countries, an average of those countries will be applied.

Brent Oil Price (\$)	0-49	50-54	55-59	60-64	65-69	70-74	75-79	80-84	85-89	...
BE	0,0%	0,0%	0,0%	0,0%	0,0%	0,0%	0,0%	0,0%	0,0%	
DE	0,0%	0,9%	1,6%	2,3%	3,0%	3,7%	4,5%	5,2%	5,9%	
NL	0,0%	0,3%	1,0%	1,6%	2,3%	3,0%	3,6%	4,3%	5,0%	
FR	0,0%	0,0%	0,0%	0,0%	0,5%	1,1%	1,6%	2,1%	2,7%	

•The grid is read at Brent × DDF. Brent = monthly average Brent Crude Oil price between the 26th of the previous month and the 25th of the month before the quarter. DDF: see the explanation on the previous slide.

Lineas surcharge grid Conventional Traffic: Diesel with DDF

Energy Surcharge Grid for 2026: Brent × DDF, Q4 2026

- Q4 2026: DDF = $(1,353 \div 0,785) \div (99,58 \div 72) = 1,724 \div 1,383 = 1,25$.
- Brent equivalent = $99,58 \times 1,25 = 124,13$ \$: the grid is read in column 120 to 124 (highlighted) instead of 95 to 99.
- Resulting Q4 surcharge: BE 2,0 %, DE 10,9 %, NL 9,6 %, FR 6,4 % of the transport price.

Brent Oil Price (\$)	90-94	95-99	100-104	105-109	110-114	115-119	120-124	125-129	130-134	135-139	...
BE	0,0%	0,2%	0,5%	0,9%	1,2%	1,6%	2,0%	2,3%	2,7%	3,1%	
DE	6,6%	7,3%	8,0%	8,8%	9,5%	10,2%	10,9%	11,6%	12,3%	13,0%	
NL	5,6%	6,3%	7,0%	7,6%	8,3%	9,0%	9,6%	10,3%	11,0%	11,7%	
FR	3,2%	3,7%	4,3%	4,8%	5,4%	5,9%	6,4%	7,0%	7,5%	8,0%	

•Brent = monthly average between 26/08 and 25/09/2026 (99,58 \$). Diesel = EC Weekly Oil Bulletin, excl. duties and taxes, average of BE, FR, NL and DE, same window (1,353 €/L). Reference 0,785 €/L = diesel at about 72 \$ Brent.
